

On-Farm Energy & Electrification Demonstration Program Summary

Up to \$750,000 available for energy demonstration projects

About the Program

Applications Now Open!

Applications close: 5pm 11 December 2026

The On-Farm Energy and Electrification Demonstration Program (OFEED) is a \$5 million initiative that aims to accelerate the uptake of proven and new-to-market energy technologies across Victoria's agriculture sector.

The program will provide evidence of the costs, benefits and return on investment, through on-farm project demonstration and knowledge sharing activities, to support Victorian farmers to adopt technologies with confidence.

Funding available

Grants of **\$200,000 to \$750,000**

Eligible organisations

- Agriculture Industry Associations
- Farming Systems and Landcare groups
- Research and Development Corporations
- Catchment Management Authorities
- First Nations, Traditional Owner organisations or Aboriginal businesses involved in primary production
- Partnerships or consortiums involving eligible organisations
- Companies with proven or new-to-market ready solutions

Individual farming businesses are not eligible to apply on their own but may participate through partnership arrangements with the above organisations.

Information session

Agriculture Victoria will host an information session to provide an overview of the program and answer questions from prospective applicants.

[Register for info session here!](#)

What types of projects could be funded?

Successful grant projects will demonstrate the value of on-farm energy technologies that either:

- Improves energy efficiency
- Reduces fuel, gas or energy consumption
- Electrifies farm operations and equipment
- Generates renewable energy that delivers broader farm system benefits

What are we looking for?

Projects should:

- Demonstrate proven technology not yet widely adopted and/or new-to-market technologies that deliver measurable improvements in on-farm energy efficiency and emissions reduction
- Demonstrate practical solutions that can be scaled and adopted by other farms, industries and regions
- Generate and share real-world insights to support future investment
- Build industry confidence and support wider adoption by sharing project outcomes, lessons learned and practical experience with farmers and industry
